## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 2, 4 – 8, 10 – 14, 16 - 18 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application No. 2004/0022369 (Vitikainen et al.).

With respect to claims 1 – 2, 5, 7 - 8, 11, 13 – 14 and 17, note that Vitikainen et al. teach an answering service where one receives call identification and response instructions from a remote user, receive a call and respond to the call in accordance with the response instructions (see Paragraph 0037 – 0040 and the Abstract). With respect to claim 2, note use of MSISDN and IP-address in paragraph 0038.

With respect to claims 4, 10, and 16 such is inherent in answering services.

With respect to claims 6, 12 and 18, note paragraph 0017

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3, 9, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vitikainen et al. in view of EP 0 957 622 (Cannon et al.).

Vitikainen et al. teach the claimed limitations except for using the name as an identifier. However, Cannon et al. discloses such, see Col. 4, lines 26 – 33. It would have been obvious to one of ordinary skill in the art to have incorporated such use of a name for identification as taught by Cannon et al. into Vitikainen et al., as such would only entail the substitution of one well known means of identification for another.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
